1987 CHART SURVEY

rm's exclusive survey of 1987's top acts is based on the year's Top 3,000 singles and Top 7,000 albums listings prepared by Gallup. The points totals shown on the right of the artists' names indicate their relative popularity. For example, for every 1,369 **Rick Astley** singles sold, record shops shifted 1,102 singles by **Madonna**, and 1,011 by the **Pet Shop Boys**. Each point represents approximately 1,000 sales, for both singles and albums. They are not compatible with the points totals for 1986, published in **rm** on February 7 1987, but will be if you multiply this year's totals by 0.55 (singles) and 0.4 (albums).
